DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/18/05 has been entered.

Election/Restrictions

2. Claims 22, 24-27, 29, and 37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/22/04.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2613

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 15-18, 23, 28, and 30-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakamura et al (6,185,312) for the same reasons as set forth in Section 5 of the previous office action, dated 7/18/05.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 38-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al (6,185,312) in view of Yamane et al (6,393,196).

Although Nakamura et al discloses the video data is MPEG video data, it differs from the present invention in that it fails to particularly disclose a packetized MPEG-2 video data stream as specified in claims 38-42. Yamane et al however, in Figure 7,

Art Unit: 2613

illustrates the concept of such well known video format. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made, having both the references of Nakamura et al and Yamane et al before him/her, to apply the common packetized format as taught by Yamane et al to the video data in the embedding system of Nakamura et al in order to conform with requirements of the MPEG-2 standard.

Response to Arguments

5. Applicant's arguments filed 10/18/05 have been fully considered but they are not persuasive. Applicant asserts on pages 10-11 of the Remarks that Nakamura et al fails to disclose the extracting means and the embedding means. However, Figure 6 of Nakamura et al illustrates the concept of such embedding 121 and extracting data (115, 116).

Allowable Subject Matter

6. Claims 19-21 and 34-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
